A “Community Report Card” will be developed based on identified strengths and opportunities for improvement. The Community Report Card will be a condensed, graphic version of key findings from this comprehensive assessment. The full text of this document as well as all appendices will be published online with active links to tables for easy navigation within the document. This design should allow researchers and grant writers to easily find information about the health status of Broome County residents. It is hoped that the depth and breadth of this assessment provides the groundwork for a variety of projects that support the health of Broome County residents. The Steering Committee felt strongly about individuals and communities taking personal responsibility for their health. For that reason, this community health assessment and the planned community report card seek to provide them with useful tools.
